

SynaptiX Collector IIoT in action

Built to withstand the harsh Australian environment, the ruggedised design of the SynaptiX Collector will deliver long-term value for your monitoring and data needs.

Whether it is level or moisture monitoring to manage water use or weather monitoring to manage spray drift risk, the SynaptiX IIoT suite provides the solution.

The complete monitoring solution consists of the Collector, a wide array of sensors, SynIoT cloud and the SAMS dashboard. Get the complete picture of your business from wherever you browse the internet, phone, tablet or PC.

Your data is your business. Novecom will assist you in the design and installation of your monitoring system and SynaptiX will collect and distribute the data, however your data is owned by you.

Novecom specialises in sensor based information systems so you can continue to specialise in the production of prime quality products.
